STADIUM EFFICIENCY

Powerful drive with electric engines together with a large snow and water tank capacity: The WM Shira has been purpose-designed for resurfacing stadiums. It boasts an immensely impressive price/quality ratio and, on request, can be fitted with countless extras. WM Shira. The perfect partner for professional resurfacing of ice surfaces of up to 1,800 m².

„The WM Shira has everything we need to resurface the ice in our stadium to perfection. We are absolutely delighted with it!“

Louis Eberle

Ice expert at the Ice Sports Centre
Oberstdorf / Germany

HIGHLIGHT

EVERYTHING UNDER CONTROL IN THE DRIVER'S CAB

The WM Shira is a guarantee of outstanding comfort for the driver and boasts a full, unobstructed view whether you're driving cabin-free or with all-round glazing. Three steps provide easy entry to the vehicle. All important information is clearly visible at a glance on the high-definition colour display, and all the main functions are keyboard-controlled. At a simple press of a button the automatic mode begins all work operations in a pre-defined order.

EMERGENCY

INTEGRATED EDGER FOR END-TO-END RINK PERFECTION

The edger is fixed to the body of the WM Shira, guaranteeing you outstanding stability and performance. It can be operated easily and safely from the driver's seat. The innovative horizontal spring-loaded system with guide wheel ensures that the edger follows the contours of the rink to perfection, and planes the ice evenly, rapidly and cleanly. Edging and subsequent cleaning of the ice surface with the swivel brushes can be carried out in one simple step. The edgers are positioned between the axels and in front of the brush, to ensure an unrestricted overview of the vehicle. When not in use, the edgers are stored between the wheels, and do not affect operation in any way.

HIGHLIGHT

FUN ALL THE WAY: THE PASSENGER'S SEAT

No other ice resurfer has it – anybody who wants to see a specialist at work close-up can sit comfortably by the operator's side. The passenger's seat is also a wonderful marketing tool, as it gives the spectator the chance to see the rink from a new perspective during the break. A competition or raffle prize never fails to add an extra thrill to the game!

HIGHLIGHT

NEED MORE THAN 2,000 LITRES OF WATER? NO PROBLEM!

When you're building up ice depth or using the water sprayer, more water is a must. The WM Shira has it all taken care of! The water and snow tanks can easily be connected into one water tank with a total volume of around 2,000 litres of water. No more standing in cold water and tiresome tugging on hoses: All operations can be carried out from the comfort of the driver's cab – there's more than enough water to do the job.

Example: 1,750-litre water tank & 1,000-litre snow tank = 2,750 litres of water

MAINTENANCE

The entire engine technology is easily accessible just by lifting the cab. This means that mechanics can carry out their work quickly and cleanly, which in turn saves on time and service costs. Our team also use remote monitoring to keep an eye on your vehicle monitor and rectify any faults which may occur.

STANDARD EQUIPMENT

PLC control

High-resolution 7" touchscreen

Button for automatic modus: operations start automatically in a fixed order

Function for automatic water filling system with immobilizer (Acquastop valve as optional)

Acoustic signal for reverse drive, snow bin cover operation and reverse of the screw conveyors

Spring-suspended and height-adjustable driver's seat with armrests

Spring suspended passenger seat

Easily accessible engine compartment (tiltable) with cap support

Maintenance-free asynchronous motors

Continuously adjustable electric four-wheel drive

Water tank made of PE

Coated snow bin

Snow bin & water tank connection (> 2,000 litres)

Hydraulic negative parking brake

Hydraulically driven and swivelling side brush

Board guide pulley

Side mirror, rear

Snow bin headlight, side headlight

Flashing warning light

System for water dosing in curves

Constant grinding pressure planing system

2 blades

2 towels

Scope of delivery set

OUR COMMITMENT

User friendliness

Through the use of top-quality components together with a well-planned design, maintenance work is extremely simple and is reduced to a minimum.

Quality guarantee

The WM Shira is a product which has been developed, built and assembled in house, from start to finish. Only by doing so can we guarantee top quality and punctual delivery times.

Detailed operating instructions

You can find all information on operation, maintenance and safety in the operating manual.

The right replacement part, every time

Order your spare parts easily and conveniently from our online portal: Our series number and digital image system enable you to find the part you need with just one click.

Service and support

Our well-networked, international team of technicians undergo constant training and will be delighted to help you whenever you require assistance.

Series production

All WM technics vehicles are series-manufactured. We know exactly which parts have been used in each series run, and can deliver the correct spare parts to you at all times. At the same time, a number of optionals can be retrofitted with minimum effort and maximum precision, even years later.

Quality consciousness

From the manufacture of individual parts right through to the final quality-control inspection: Every step of the process is carried out and monitored with the utmost of precision. Each and every member of our staff is well-trained in his specialist field, and carries out all tasks conscientiously. This is a great advantage for our customers, who can be sure of receiving a technologically sophisticated product which has been manufactured to the very highest of quality standards.
